How to View Loans and Assign Them to Loan Aid Funds in BSAC (Fund Administrator's Version)

- 1. The counsellor will have used Minerva to create a generic loan offer:
 - a. Including payment method to fees, cheque, loan or combination of the above.
 - b. When they saved, this info is pushed to BSAC INB forms. You view it by logging into BANNER INB using your ORACLE ID (e.g. for Jane it is 'JAMRO') and password.
 - c. At this point the loan has been created in a generic state (not attached to a FOAPAL) and the student will not see it on the WEB yet

In INB you can see the student's loan and other awards on several forms: **KVIASUM**, **KVAAWRD**, **KVISAWK**, and/or **KVIAWRD**. All these forms show similar data but it is displayed differently and some show more than others. If the loan has been offered and not assigned to a loan fund then:

- The loan will be in OFFR aid fund status
- The loan aid fund code assigned will be of format X_%LOAN% and the description will be of format Generic%Loan%
- Date inserted and user id of the counsellor will appear on the record.

2. KVISAWK: Type the aid year and period ('YEAR') in the key block and CTRL/PGDN or click next block. When inside the next block, Press F7. Type X_%L% in the aid fund code and press F8. Note: This form shows a large amount of very useful information including the FOAPAL, whether and how much of the aid has already been paid, and comments. Comments, User ID and date inserted are to the far right of the scrollable section. For purposes of finding loans to be assigned for the day you do not need to see most of this information. However the comments may be useful in deciding which aid fund to use for this student.

Quick Tip #1: If you position your cursor on the student you are processing next in KVISAWK, his ID and Aid year will default into KVAAWRD for you.

3. The X% loans on KVISAWK are the loans you have to assign and process. (Type X% to see all the awards that need assigning, including scholarships, bursaries and fellowships). You can screen print this form to have a hard copy or you can ask Angie/Thierry to write a report if this becomes important. The HELP/EXTRACT DATA function currently *does not work properly – it will download everything (huge and hangs the system) - not just the X% funds you selected.*

Quick tip #2: F5 and type in form name KZIFDQY in order to help you to choose an aid fund code for the student you have chosen to process next.

- 4. **KZIFDQY:** use this form to find aid funds that fill the criteria for the aid that was offered by the counsellor and which have remaining balances. E.G. you could search of an in-course loan as follows:
 - a. Choose a loan fund source code
 - b. Make sure if it is a loan you choose need based (2) as award basis
 - c. Choose a fund balance amount that can at least cover the loan that was offered
 - d. In next block you can stipulate property codes that will ensure that you are choosing the right kind of award and that your list is not too long. You can stipulate fund text entries here also in order to find a fund, say, especially for medicine students.

 . 							

Note: if the counsellor made comments on the award record about the student, these can be seen on KVISAWK/KVIASUM/KVAAWRD). They may be used to help you decide which aid fund code to assign to the student. If the aid fund code has been defined with fund text to help in matching, then you can search for it as shown above. Also you can look at student attributes such as program of study on Minerva query forms.

Below is an example of how fund text for REQUIRED value would appear on Lacey Aid Fund:

How to View and assign Loan to Loan Aid Funds (Fund Administrator).doc

Choose from awards showing on the previous screen (chose Lacey for our example). Finish off the splitting by exiting out of KVIFDQY. Go to KVAAWRD.

5. KVAAWRD: If not defaulted in, type in the student's ID, aid year and period ('YEAR') and do next block (ctrl/pgdn). If you do not notice the X% loan you are looking for immediately you can search for it using X%L%. Note: much info is viewable on a multi-lined block. For some info you need to go to other tabs. The USER ID is evident immediately. This form shows you all possible data but there are only 2 awards per page and you need to really understand how to navigate through it. For full understanding of this form refer to How to Award Institutional Financial Aid (available soon).

Interesting things to note:

- a. The loan in offer stage is not displayable on the Web to the student
- b. Comments appear on the right. These may display instructions or characteristics of the student important in choosing the finance fund to assign so read these carefully.
- c. The second last TAB (Aid Fund-Aid ...) shows properties that are associated to the kind of aid being offered. When you assign a Finance fund to the offered loan you must respect these properties in your choice of aid fund.
